

ZERO TO SHIPPED · 08

Shop your own wishlist.

Four little stores,
built into the app.
Tap what you want,
and it lands on your
list, already filled in.

Off the Shelf.

@SRIVARDHANJALAN · SWIPE →

THE PROBLEM

Every wish, typed by hand.

A name, a price, a link, for every single thing you want. So the list starts empty and mostly stays that way.

WHAT WE BUILT

Now you just **pick it.**

Open a store, tap the thing you want.
It lands on your list with the details
already in.

A CURATED SHELF

Four little shops to browse.

**Home &
living**

**Gadgets
& tech**

Books

**The
outdoors**

ONE TAP

The whole thing
comes **with it.**

Wireless Earbuds

₹8,999

where to buy

The name, the price, and where to
buy, all carried straight over.

THE PAYOFF

Your list fills **itself**.

No typing, no hunting for details. Just the things you actually want, ready before the occasion.

ZERO TO SHIPPED · 08

**Read the full build,
free on Medium.**

A wishlist app, built one shippable step at a time.
