

ZERO TO SHIPPED · STEP 02

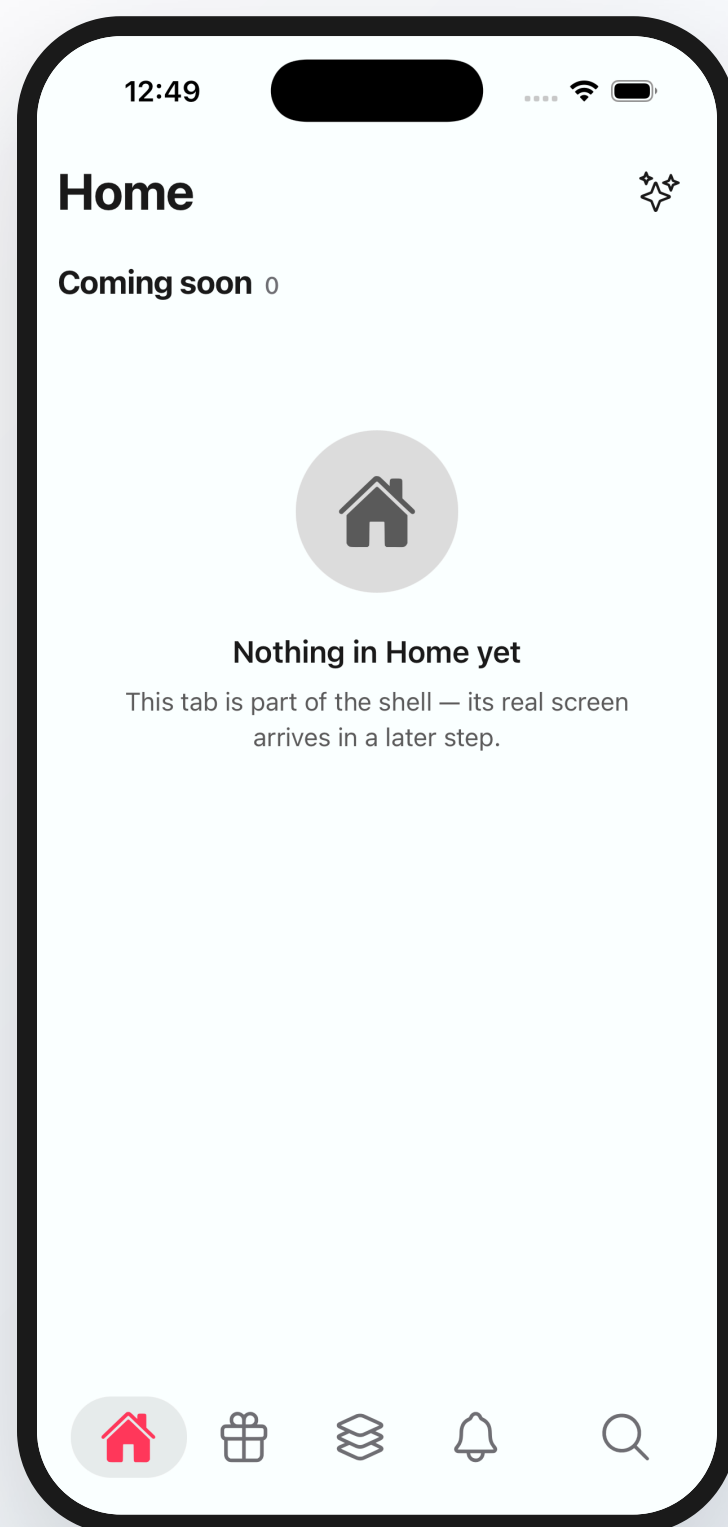

Today we build an app that does **nothing.**

On purpose.

SWIPE →

Dressed to Ship.

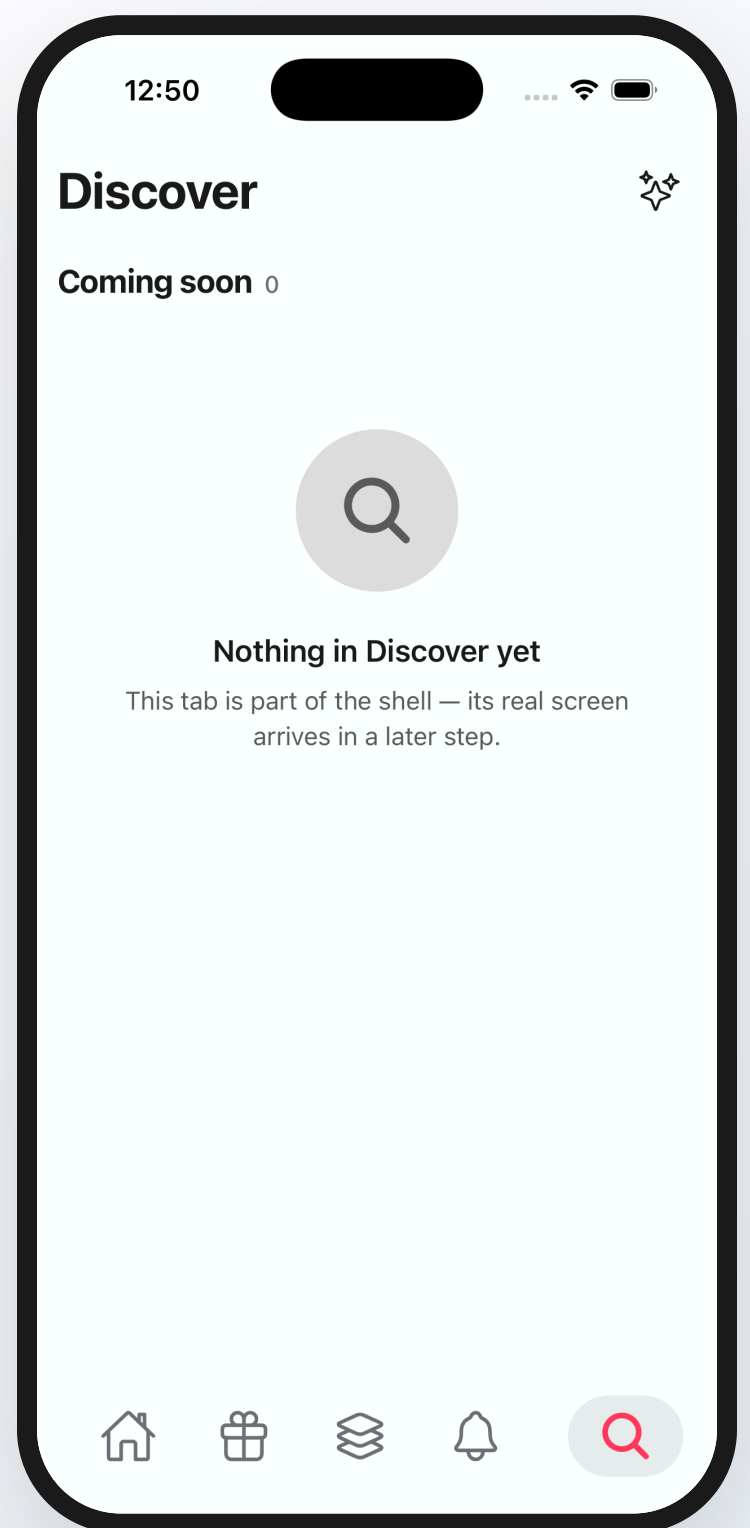

@SRIVARDHANJALAN

WHY SHIP NOTHING?

Lock the visual system **before** the features exist.

Or spend week six fixing the same padding on eleven screens.

THE IDEA

Consistency isn't a habit. It's a door you lock behind you.

Make inconsistency impossible — you'll never have to resist it.

THE TOKENS

The **entire** design system.

6

colors

2

text styles

1

radius

2

shadows

5

chrome
metrics

A token joins the file when a screen first needs it. **Never in advance.**

THE RULE

"A value that appears twice is a decision pretending to be a coincidence."

CONFESS I O N

My own linter humbled me.

6

rounds to a clean
pass

1,670 → 829

lines of code

0px

visual difference

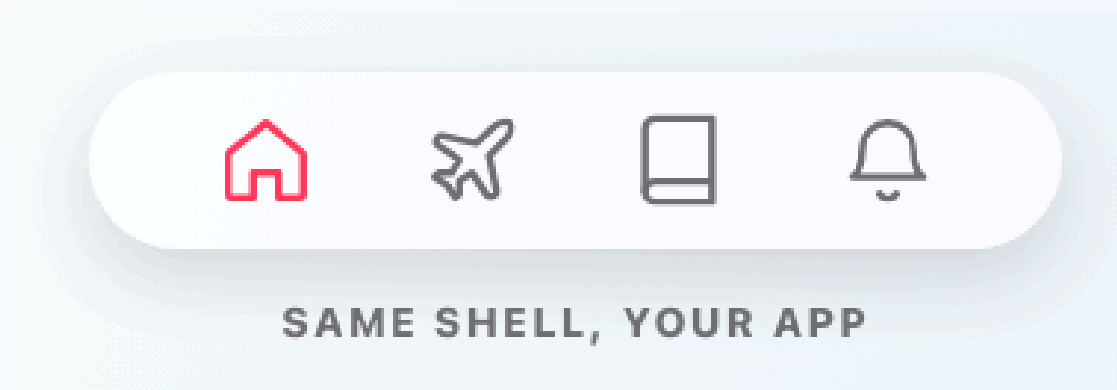

Speculative code is inventory — and inventory
rots.

THE PAYOFF

Rename the app in one edit.

```
src/config/tabs.ts

export const Tabs = [
  { key, title: 'Wish Store' 'Trips', icon: 'gift'
    'airplane' },
  { key, title: 'My Stuff' 'Journal', icon: 'layers'
    'book' },
  ...
] as const satisfies readonly TabConfig[];
// no component files touched
```

ZERO TO SHIPPED · STEP 02

The full build, step by step, **free on Medium.**
