

# Photos that can't leak.

A profile photo and a  
cover, private the  
moment you set  
them.

**Photos Without the Exposure.**

@SRIVARDHANJALAN · SWIPE →

## THE WORRY

# A photo online ends up **everywhere.**

A shared link, a screenshot, an old upload that never dies. You lose track of where your face lives.

## WHAT WE BUILT

# Here, they stay **yours.**

Set a profile photo and a cover. There is no public link, so there is nothing to leak.

PRIVATE, NOT HIDDEN

**And they still show  
up instantly.**

Private does not mean locked away from you. Your photo loads the moment you open the app, every time.

NOTHING LEFT BEHIND

# Change your mind? It just disappears.

Start a new photo, walk away, and it quietly vanishes. Only the one you save ever sticks.

## THE PAYOFF

**So your face stays  
yours.**

No stray copies, nothing on the open web, nothing you didn't choose. Just your photo, where you put it.

ZERO TO SHIPPED · 06

**Read the full build,  
free on Medium.**

A wishlist app, built one shippable step at a time.
